## PROFESSIONAL SUMMARY

---

Aspiring Software Engineer with hands-on experience in full-stack web development and Java, having strong problem-solving abilities backed by solid Data Structure and Algorithms skills. Passionate about building secure, scalable, and user-focused applications while continuously learning and contributing to innovative projects.

## WORK EXPERIENCE

---

### Data Alchemy PVT LTP | Java Intern | 18 Feb 26-Current

- Engineered robust and high-performance backend applications by leveraging Java and the Spring Boot framework to streamline server-side logic and improve system efficiency.
- Designed and integrated interactive desktop application components using the Swing library to enhance user interface functionality and overall software usability.
- Partnered with cross-functional development teams to architect and deploy scalable software solutions that align with modern technical standards and project requirements.

### Excel Controlinkage PVT LTP | SAP Intern | 21 June 25 – 21 July 25

- Gained hands-on experience in SAP MM (Materials Management) and ABAP, understanding the core architecture and data flow of SAP ERP systems. Learned how to navigate SAP modules, customize transactions, and interpret backend logic through ABAP.
- Worked on real-time client requirements, enhancing communication, documentation, and problem-solving skills in a professional setting.
- Developed a strong foundation in enterprise-level business process management and ERP workflow optimization.

## PROJECTS

---

### CODELENS | *Spring Boot, React, SQL, Python*

Architected a distributed AI-as-a-Service application using React, Java Spring Boot, and PostgreSQL, integrating Gemini/Ollama for automated codebase analysis. Implemented a custom File-Walker algorithm and RESTful pipeline to ingest remote repositories, providing developers with an interactive "Logic Explorer" to navigate complex project architectures.

### E-Commerce Backend System | *Java, Spring Boot, PostgreSQL, Rest Api*

Developed a scalable backend system for an E-Commerce platform using Spring Boot and Java. Implemented RESTful APIs for user authentication, product management, cart operations, order processing, and payment workflow. Integrated database operations using JPA/Hibernate with MySQL for efficient data storage and retrieval. Tested APIs using Postman and followed layered architecture for clean and maintainable code.

## Skills

---

Languages: Core Java, JavaScript, C++, C, Html, CSS, Python.

Database: MySQL, PostgreSQL, Mongo DB.

Frameworks / Libraries: Spring Boot, JPA, Hibernate, React js, Node js, Express js, GSAP

Familiar: Servlet, SAP Erp Software (MM Module), Rust, Docker, Three JS, Swing, Streamlit.

## EDUCATION

---

YESHWANTRAO CHAVAN COLLEGE OF ENGINEERING  
B. TECH IN COMPUTER SCIENCE ENGINEERING (CGPA: 8.15)

NAGPUR, INDIA  
EXPECTED JUNE 2027

## OTHER ACHEIVEMENTS

---

- Runner-up in SVP CET Hackathon.
- Finalist of Central India Hackathon.
- Led a team in Smart India Hackathon to develop Smart Attendance System Using QR
- Earn more than 14 badges of Leetcode.
